Gray Electronics
512 268 2738
NO KILL DATE

GREEN Features:

1. Complete Solar Power system for IP Security Dome Cameras without ANY network cables or AC Power cables installed!! NO 120VAC needed.
2. Solar Power backed Up ON Re-chargeable Batteries that provide 24/7 Power to the Camera even when in **arctic** cold or Texas Desert **heat**.
3. System provides an Internet Connection * to Grays IsIp Software which allows pictures to be Intelligently selected and stored on IsIp Databases Anywhere in the world that has internet access.
4. Alarms signals detected by PIR's, Video Motion, Etc. are sent via the internet* to IsIp which launches Alarm Script Commands. Each Script includes up to 10 commands that may include Zoomed in scenes to Enhance the details that caused the Alarm condition. For example license plate information on vehicles, etc.
5. Live view access to Grays Solar Camera Packages Is possible with only an Internet access and Windows Internet Explorer. Of Course, users must have assigned Names and Passcodes to watch IsIp control and process Alarms or manually take a closer look.
6. * Grays Solar Powered Internet connection is via a G3 or G4 Broadband Modem provided by AT&T, Verizon, Sprint or Other mobile Broadband providers.
